CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician

William A. Ruff, Assistant

This volume contains a series of tables, supplementing Volume II, of all retail stores reported in the Census of Business for 1935, grouped into 11 business classifications, showing by States the number of stores and volume of sales in each county, city and place of more than 2,500 population, and the remainder of each county. It corresponds to Retail Vol. VIII (Areas) of the 1933 Census of American Business and to Retail Vol. I (Table 14) of the 1929 Census of Distribution.

Included also is a series of summary tables, showing the number of stores, sales, personnel, pay roll and expenses by detailed kinds of business for each State as a whole and for each city of more than 500,000 population. Particularly helpful is the comparison table on page 81.

The facts contained herein were collected by a complete field canvass of retail stores in every State, city and county in the United States, by the Bureau of the Census, with funds provided by the Works Progress Administration. They represent the operations of retailers during the year 1935.

Retail reports are prepared under the supervision of John Guernsey, Distribution Economist for the Census Bureau, by Ira D. Anderson, Retail Assistant, Hugh Duffey, James O. Reid and Irwin Heine.

RETAIL DISTRIBUTION: 1935MARKETING SUMMARY

The number of stores and their sales presented herein by areas are from the 1935 Retail Census, a part of the Census of Business. In the course of examining and testing the individual schedules for accuracy and completeness, they were classified and coded in 66 business classifications (see page 11). These 66 detailed classifications are consolidated and tabulated in 11 business groups by areas, for this marketing summary (pages 82 to 278).

In addition to the breakdown of each State by areas, there is included herein a series of State summary tables, presenting the final totals for the 66 kinds of business for each State (pages 13 to 61) and for each city of more than 500,000 population (pages 62 to 78).

In a companion volume (Vol. II) are shown, in addition to stores and sales, the total number of proprietors and employees and the total payroll of all stores combined, for each State, county, city or place of more than 2,500 population and remainder of each county.

Areas are classified according to the population figures of 1930. Although the Bureau of the Census has prepared estimates of population by States subsequent to 1930, no official estimates for the smaller areas are available. An estimate of population by States by years (1930-1936) is shown on page 80.

Comparability with 1933

The 11 principal classifications used herein, as described below, are comparable to those used in the 1933 census (Retail Vol. VIII - Areas) with three exceptions:

1 - Whereas in 1933 the group called "Farmers' supplies and country general" included hay, grain and feed stores, fertilizer dealers, harness shops, seed stores and other farm and garden supply stores in addition to country general stores, only the latter (called "General stores") are included in 1935. The others are included in "Other Stores".

2 - Whereas in 1933 the 3,767 beer and liquor stores then in existence were included with food stores, and their sales of \$16,730,000 were included in food store sales, in the area tables for 1935 beer and liquor stores are included in "Other stores". They are shown separately by States in the State Summary tables (pages 13 to 61) and for cities of more than 500,000 population (pages 62 to 78).

3 - A negligible number of retailers exclusively of fuel oil for domestic household consumption were included with filling stations, in the 1933 census. In the area tables for 1935, such fuel-oil dealers are included with "Other Stores". They are combined with coal and ice dealers as "Fuel and ice dealers" in the State summary tables.

Composition of Each Business Group

Retail distribution, as covered in this Census, is the process of purveying goods to ultimate consumers for consumption or utilization, together with services incidental to the sale of goods. The function of the retailer is primarily to anticipate the wants of the consumer and to make available, at the right time and at a convenient place, a reasonable selection of goods capable of satisfying those wants. The distinguishing characteristic of a retailer is that the business is done in a retail manner, in a place of business open to the general public.

The business classifications, although usually related broadly to the kind of merchandise carried, are not interchangeable with commodity classifications. For instance, grocery store sales are not exclusively sales of groceries; apparel stores sell accessories and shoes in addition to outer apparel; drug stores sell many lines other than drugs. Stores are classified according to their principal commodities or according to their popular designation. Dual-line stores, which could fall into more than one classification, are classified according to the kind of business which is the more important in terms of sales.

Food stores include 11 classifications shown in detail in the State summaries (pages 13 to 61) as follows:

Candy and confectionery stores	Combination stores (groceries and meats)
Dairy products stores (including milk dealers)	
Egg and poultry dealers	Meat markets
Delicatessen stores	Fish markets - seafood
Fruit stores and vegetable markets	Bakeries and caterers
Grocery stores (without meats)	Other food stores

The classification "Bottled beer and liquor stores" which appeared in this group in the 1933 census is now included with "Other stores".

Eating and drinking places consist of restaurants, cafeterias, lunch rooms, lunch counters, refreshment stands and drinking places. Sales of the latter frequently include meals. Beer, wine and liquor in glasses, for consumption on the premises, are often sold in restaurants and other eating places as well as in those places classified as drinking places.

General stores (also called country general stores) are general merchandise stores which also sell a substantial proportion of foods. They are located typically but not exclusively in the smaller communities. In the 1929 census the food proportion of country general store sales, based upon a sample described in the reports of that census, varied from an average of 54 percent to 67 percent. No commodity analysis was available in 1933.

General merchandise group consists of department stores, variety (5-and-10 and limited price) stores, dry goods stores and general merchandise stores. The latter are stores selling a general line of merchandise in which food, if any, is a negligible item. General merchandise stores selling a substantial quantity of food are classified as general stores, regardless of where located. General merchandise stores exceeding \$100,000 in annual sales are classified as department stores. The distinction between department stores and dry goods stores is that department stores sell a greater variety of merchandise than merely dry goods and women's apparel, usually including furniture or other household lines and men's lines, whereas dry goods stores appeal primarily or exclusively to women customers. A dry goods store becomes a department store if, and when, it adds furniture, household appliances, hardware and/or men's clothing and furnishings, provided its total sales exceed \$100,000. If its sales are less than \$100,000 per year it becomes a general merchandise store.

Apparel group includes the following classifications found in the State summaries:

Men's furnishings stores	Furriers and fur shops
Men's clothing and furnishings stores	Millinery stores (including leased millinery departments)
Family clothing stores (men's, women's and children's)	Custom tailors
Women's ready-to-wear specialty stores	Accessories and other apparel stores
	Shoe stores

The classification "accessories and other apparel stores" includes corset and lingerie shops, hosiery shops, children's specialty shops, infants' wear shops, and mail-order houses engaged exclusively in the sale of apparel.

Automotive group (except filling stations) includes motor-vehicle dealers, used-car dealers, automobile accessories, tire and battery stores, repair garages, and other automotive retailers, including those selling air-planes and parts, boats (motor boats, yachts and canoes) and trailers.

Filling stations are retailers primarily of gasoline and oil for the operation of motor vehicles. While gasoline and oil constitute their principal commodities, they may sell also such related commodities as tires, batteries and automotive accessories, and may operate lunch counters and tourist camps. Retailers exclusively of fuel oil for domestic household consumption are not included, but are classified as Fuel dealers and included with "Other stores". Tourist camps whose principal revenue is derived from room rentals and/or the sale of meals, whether or not they sell gasoline and oil incidentally, are included in the Census of Service Establishments and not in the Retail Census. In addition to filling stations, there are other retailers of gasoline and oil whose principal business places them in other classifications, such as grocery stores, farmers' supply stores and country general stores.

Furniture-household-radio group consists of five classifications found in the State summary tables as follows:

Furniture stores	Household appliance and radio stores
Floorcoverings, drapery, curtain and upholstery stores	Radio dealers (not selling household appliances)
Other home furnishings stores	

Household appliance and radio stores are those whose principal business is the sale of electric or gas household appliances such as refrigerators, ranges, washing machines, vacuum cleaners, and other electrical appliances, or such appliances in combination with the sale of radios. Many stores in this classification are operated by gas and electric utility companies, primarily for the sale of appliances intended to increase the consumption of their gas and electricity.

Radio dealers are those principally engaged in the sale and care of radios, who do not also sell household appliances. Radio repair shops whose principal revenue is derived from services rather than sales are shown in the Service Census and not in the Retail Census.

The classification "other home furnishings stores" is identical with a similar classification in previous retail censuses and includes aluminumware and brush can-vassers, antique dealers, lamp shops, etc.

Lumber-building-hardware group contains six classifications described in detail in the State summary tables as follows:

Lumber and building-material dealers	Heating and plumbing equipment dealers
Hardware stores	Paint, glass, wallpaper stores
Hardware and farm implement dealers	Electrical supply stores

In using any of these classifications for market analysis it should be taken into consideration that it is extremely difficult to draw the line between whole-

salers and retailers, particularly in the lumber and building-material field and to the lesser extent in the hardware field. If a dealer reports that he does more than 50 percent of his business at wholesale he is classified in total in the Wholesale Census, which sets out separately as related data the amount of his retail business, but does not deduct it from the dealer's total sales. Such retail sales of wholesalers (or those selling more at wholesale than at retail) do not appear anywhere in the Retail Census. Likewise, dealers doing some but not 50 percent of their business at wholesale appear in total in the Retail Census. In this particular field it is essential that both Wholesale and Retail data be taken into consideration.

The classification "Heating and plumbing equipment dealers" is not identical with the "Heating and plumbing stores" classification in the 1933 reports; nor is the classification "Electrical supply stores" identical with "Electrical shops" of 1933. Both differ by the inclusion in the 1935 Service Census of those electrical shops whose income for services was greater than the sale of merchandise, and by the inclusion in the 1935 Construction Census of some heating, plumbing and electrical contractors who were embraced in the 1933 Retail Census. Changes in the nature of the business resulting from renewed activity in home construction and repairs accounts for many of the shifts in classification. Under such circumstances a true measure of the status quo in 1935 is considered to outweigh the value of true comparability.

Drug stores include those with and without fountains (classified separately in the State summary tables) as well as leased drug departments in other stores, and direct-mail retailers of drug items.

Other stores group, in addition to including beer and liquor stores (packaged alcoholic beverages) combines the following classifications which are shown separately in the State summary tables (pages 13 to 61):

Bicycle shops	Farm and garden supply stores
Book stores	Jewelry stores
Cigar stores and cigar stands	Luggage stores
Florists	Newsdealers
Fuel and ice dealers	Sporting goods stores
Gift, novelty, souvenir shops	Others not specifically
Hay, grain and feed stores (without groceries)	included elsewhere
Hay, grain and feed stores (with groceries)	Second-hand stores

Comparison with 1933 and 1929

Following the area tables are three pages (pages 279-281) containing summary tables by States by the 11 business groups, for 1935, 1933 and 1929 respectively, with the figures for the two previous years adjusted to substantial comparability with the 1935 census.

RETAIL DISTRIBUTION: 1935SECTION TWO - AREA TABLES

The principal contents of this Section comprise a series of tables showing the number of stores and volume of sales in each county throughout the United States, and for each city of more than 2,500 population, and for the remainder of each county, arranged in 11 business groups. The several detailed kinds of business making up each business group are described on pages 7 to 10 of this volume.

Included in this Section (page 81) is a convenient summary table of the retail censuses of 1935, 1933 and 1929, comparing by States and geographic divisions the following data:

Number of stores, amount of sales, percent change in sales from one census year to another, ratio of each State's sales to total sales, number of employees and amount of total pay roll.

Included also are three summary tables (pages 279 to 281), for the years 1935, 1933 and 1929 respectively, comparing the number of stores and amount of sales by States and geographic divisions.

ESTIMATED POPULATION BY STATES, JULY 1, 1930 TO JULY 1, 1936

For convenience in making certain computations and comparisons by States, there is shown below an estimate prepared by the Bureau of the Census as of July 1 of each year 1930-1936, incl.

Division and State	Census population, April 1, 1930	Estimated Population

NOTE: Comparable figures for 1933 in similar form were published by the Bureau of the Census in Retail Values, 8, entitled "Retail Distribution: 1933, by Area", part of the Census of American Business of 1933, available in most libraries. X. Withhold to avoid disclosure 1/ Northville is an unincorporated place in Washtenaw County. 2/ One large general store, and a department store, which in 1933 was classified in the general merchandise group, because funds constituted a substantial majority of its sales.

RETAIL DISTRIBUTION

VOLUME IV

TYPES OF OPERATION

Relative Importance of Independents, Chains
and Other Types of Operation

In Each State as a Whole, and in Specified Kinds of Business

JANUARY, 1937

UNITED STATES DEPARTMENT OF COMMERCE

Daniel C. Roper, Secretary

BUREAU OF THE CENSUS

William L. Austin, Director

CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician

William A. Ruff, Assistant

This is an analysis of retail distribution in the United States during 1935 by Types of Operation, with separate analyses for each State and for each city of more than 500,000 population. Practical considerations involving safeguards against disclosure of the operations of multi-unit organizations and unusual types prevent publication of similar data for most smaller areas, so the 500,000 population minimum is followed throughout.

This volume corresponds to Retail Vol. VI (entitled Chains and Independents, and Other Types of Operation) of the 1933 Census of American Business and to Retail Vol. I (Tables 5-A and 6) of the 1929 Census of Distribution.

There will be no further Type report for smaller areas, although Retail Volumes II and III of this series present detailed data for all types (combined) for each county, city and place of more than 2,500 population. A later special report, entitled Retail Distribution by Chains, will present further facts about the operation of retail chains, their central offices and their warehouses, in detail comparable to that reported for 1929 and 1933. (1929: Retail Chains, 270-page booklet, 20¢; Superintendent of Documents, Washington. 1933: Retail Vol. I, p.p. 30 to 33; Publications Division, Bureau of the Census, Washington).

The facts on which these tables are based were collected in 1936 by a complete canvass of retail stores in every State, city and county in the United States, by the Bureau of the Census, with funds provided by the Works Progress Administration. They represent the operations of retailers during the year 1935. They were tabulated, analyzed and published by the Business Census Division, in the Bureau's branch in Philadelphia.

Retail reports are prepared under the supervision of John Guernsey, Distribution Economist for the Census Bureau, by Ira D. Anderson, Retail Assistant, Hugh Duffey, James O. Reid and Irwin Heine.

ARRANGEMENT AND CONTENTS OF VOLUMES

Vol. I - United States Summary. Contains national summaries, under various classifications, of the data presented in other volumes in detail; a general description of retail trade in 1935; comparisons with the previous Retail Censuses of 1933 and 1929; definitions of terms and classifications; and summaries of the Wholesale, Service and other Censuses which contain data directly related to retail census data.

It also contains new matter not treated in greater detail elsewhere, including some sales comparisons of groups of identical stores for 1935, 1934 and 1933; a summary of the number and nature of stores operated by negro proprietors; and sample compilations of other data so limited in interest or so incomplete as to be excluded from detailed treatment in area volumes.

Vol. II - County and City Summaries. Contains (1) a summary of all types and kinds of retail business (combined) for each State, county, city and place of more than 2,500 population and remainder of each county; (2) a series of tables for each city of more than 50,000 population, by 54 kinds of business; (3) a series of tables for each city of 10,000 to 50,000 population, by 11 business groups; (4) analyses by size of city, for each State, of all stores and sales arranged in 11 business groups.

Vol. III - Kinds of Business, by Areas. Contains a series of tables showing stores and sales by kinds of business in each State, county, city and place of more than 2,500 population, and remainder of each county. For this purpose all kinds of business are included in 11 business groups and reported uniformly for each area. For greater detail the 11 groups are expanded in separate tables, for each State as a whole and for cities of more than 500,000 population, into 66 detailed business classifications.

Vol. IV - Types of Operation. Contains an analysis of stores, sales, personnel, pay rolls and operating expenses, by types of operation (independents, chains and other types), for each State as a whole and for each city of more than 500,000 population, for (1) all kinds of business combined and (2) 26 principal kinds of business separately.

Vol. V - Employment and Pay Roll. Contains monthly employment data by kinds of business, for States and for cities of more than 500,000 population; also data on rates of pay, sex and full-time versus part-time status, by functional classes of employment (executives, office workers, salespeople, etc.).

Vol. VI - Credit Sales, Stocks, Size of Business, and Other Data. Contains data on credit and instalment sales, value of merchandise stocks on hand at the end of the year, analyses by size of business, and analyses by sources of sales volume (whether sales of merchandise, meals and fountain, or repairs and services).

Vol. VII - Commodity Sales. Contains a series of tables analyzing separately for each State the sales of each principal kind of business by commodities, showing what commodities are sold and, insofar as possible, the relative importance of each to the total sales of the kind of business analyzed.

Special-Subject Reports. Some special reports in booklet form will be published, bringing together available Census data on subjects of general interest. Among those in preparation, the completion of which is subject to the limitations of time and budget, are:

- Retail Chains and Ownership Groups
- Consumer Cooperatives and Voluntary Chains
- Food Retailing
- Liquor Retailing
- Apparel Retailing (including Shoes)
- Automotive, Gasoline and Oil Retailing
- Furniture and Household Appliance Retailing
- Drug Retailing
- Retail Operating Expenses

RETAIL DISTRIBUTION: 1935

TYPES OF OPERATION

Herein are presented detailed analyses by types of operation, of stores, sales, personnel, pay roll and operating expenses of the 1,653,961 retail stores enumerated in 1936 as of the year 1935.

In addition to its kind-of-business classification (grocery, drug, hardware, etc.) each store was classified according to its type of operation (independent, chain, mail-order, utility-operated, etc.). The several types shown in this report other than independents and chains, even though they are capable of designation in each instance as either independents or chains, are otherwise classified because of the greater significance of the specified type. (For definition of terms, see page 10).

In any study of chains, therefore, it is necessary to take into consideration not only the chain units designated as such in this report, but also any chains of mail-order houses, utility-operated stores, leased departments or other types. For this purpose a special report is provided, entitled "Retail Chains and Ownership Groups". It is comparable to a special report in the 1929 retail census entitled "Retail Chains", and to Vol. I, pages 29 to 33, of the 1933 retail census.

Chain Ratio Lower

The chain sales ratio, which was 20.0 percent of total retail sales in 1929, and rose to 25.4 percent of total sales in 1933, returned to a position about half way between the two extremes, averaging 22.8 percent of total sales in 1935.

Chains increased their sales nearly 19 percent between 1933 and 1935, at the same time reducing the number of stores 10 percent. Independents increased their sales nearly 36 percent and the number of stores more than 9 percent.

Independents increased their sales per store 24 percent between 1933 and 1935. Chains increased their sales per store 31 percent. Sales per store for independents in 1935 averaged about \$16,450, whereas average sales per chain unit averaged about \$59,200. In 1935 the average sales of leased departments was about \$21,700; of utility-operated stores, \$31,300; of mail-order houses, \$1,111,200; and of direct-selling (house-to-house) regional offices, \$19,700.

Stores and sales in each type classification shown in this report compare with those of previous years as follows:

Comparison of Stores and Sales by Types, by Years

Types of Operation	Stores			Sales (add 000)		
	1935	1933 (a)	1929	1935	1933 (a)	1929
Total, all types	1,653,961	1,526,119	1,543,158	\$33,161,276	\$25,037,225	\$49,114,653

Other types	2.1	1.5	.6	1.6	1.6	.7

- (a) 1933 figures reflect an adjustment for 92 milk distributors erroneously classified in 1933 as house-to-house selling.
 (b) Included with "Other Types" in 1933.

Shown for each type, in addition to stores and sales, are data covering personnel, pay roll and operating expenses. The latter are exclusive of any compensation for the services of active proprietor-owners of unincorporated businesses, at least the clerk-value of whose services necessarily must be imputed in order to establish any comparable relationship between types. This is especially true of expense comparisons between chains which are usually corporations, and independents which in most kinds of business are usually unincorporated. In the reported expenses of the latter the equivalent of the wage of one employee is lacking for each proprietor shown. After proper adjustment for proprietor's compensation, expenses can be compared between types of operation only if confined to specific kinds of business, since kind of business and size of city are controlling factors in operating expense ratios.

Expenses, pay roll and employment data are shown in the following summary for 1935:

Census of Business Retail Distribution: 1935		UNITED STATES SUMMARY: 1935									
STORES, SALES, PERSONNEL, PAY ROLL AND OPERATING EXPENSES, BY TYPES OF OPERATION

† Revised.

Independents increased their stores more than 9 percent and their sales 36 percent between 1933 and 1935; chains reduced the number of chain-operated units 10 percent and increased their sales nearly 19 percent. Independents in 1935 did 63.7 percent of their 1929 dollar volume; chains did 76.8 percent. Mail-order houses, (exclusive of their retail stores) did 81.5 percent; utility-operated stores (primarily selling household appliances) did 75.8 percent.

House-to-house selling shows a substantial increase over 1933, which in turn was higher than in 1929. Mail-order houses (exclusive of their retail stores) constitute about 30 percent of the sales of "all other types." State Liquor Stores account for an additional 12 percent of the sales of "all other types," their \$160,665,000 of sales in 1935 representing a considerable part of the increase over previous years for this group. A better coverage of market and roadside stands is also reflected in the increase shown. Consumer cooperatives, although included in "all other types," are not shown separately because they are treated in greater detail in one of the special-subject reports of the Retail series, entitled "Consumer Cooperatives and Voluntary Chains."

By States

Included in this volume (pages 43 to 168) are separate tables for each State, and for each city of more than 500,000 population, showing retail distribution by types of operation. A comparative summary by major types is shown on Page 16.

In all but four States the chain sales ratio dropped between 1933 and 1935. The exceptions are Colorado, District of Columbia, Maine and Vermont, in each of which States chains now do a greater proportion of the business than they did in 1933 or in 1929. In Colorado the relative proportion of the business done by chains as compared to independents is considerably affected by incomplete coverage in certain parts of the State, particularly Denver, because this incomplete coverage affects the sales figures for independents to a much greater extent than it does the chain figures.

In all but two States the chain sales ratio was greater in 1935 than it was in 1929. The exceptions are Idaho and Montana. In Idaho the 1935 ratio was 19.9% vs. 20.7% in 1929. In Montana the 1935 ratio was 14.8% vs. 15.1% in 1929.

The chain sales ratio is higher than the national average of 22.8% in twelve States, as follows:

California	25.7%	Michigan	25.3%
Connecticut	24.5%	New Jersey	25.1%
Dist. of Columbia	29.7%	New York	25.0%
Illinois	29.3%	Ohio	24.0%
Indiana	24.3%	Pennsylvania	24.9%
Massachusetts	28.9%	Rhode Island	26.2%

In all of these States the chain sales ratio was also higher than the national average in 1933 and in all except Indiana it was higher than the national average of 1929.

The twelve States with the lowest chain sales ratio in 1935 are:

Mississippi	11.1%	North Dakota	15.9%
Arkansas	12.3%	New Mexico	15.9%
Wyoming	14.7%	South Carolina	16.2%
Montana	14.8%	Nebraska	16.5%
Minnesota	15.1%	Alabama	16.7%
Nevada	15.2%	Wisconsin	17.6%

By Kinds of Business

Types are shown for 26 kinds of business separately, in addition to the above analyses for all kinds combined. Each State report (section two) contains these kind-of-business analyses. In addition there is included herein (pages 17 to 42) a series of 26 tables bringing together under each kind of business the data by States.

A comparison of sales ratios for the 26 kinds of business for the United States as a whole, showing the nature of the changes which have occurred between 1929 and 1935, follows:

COMPARISON OF RETAIL SALES RATIOSBY TYPES OF OPERATION, 1935, 1933 AND 1929

	<u>INDEPENDENTS</u>			<u>CHAINS</u>			<u>OTHER TYPES</u>

(a) Principally State liquor stores. (b) Principally mail-order. (c) Principally leased departments. (d) Principally utility-operated stores. (e) Principally consumer cooperatives.

(x) No true comparisons available.

DEFINITION OF TERMS AND CLASSIFICATIONS

Stores are places of business predominately retail in character, in and from which goods are sold to ultimate consumers for consumption or utilization. The number includes filling stations, garages, market stands, lumber and coal yards, eating and drinking places, mail-order houses, district offices of house-to-house canvassers, and leased departments, as well as stores.

Sales include the sale of merchandise and meals (together with incidental repairs and services), both on credit and for cash. Sales taxes are included. Sales are net, in that returned goods have been deducted.

Sales ratios express in percentage form the ratio of each type-classification to the total for all types. The percentages in the 1933 and 1929 columns in the type tables in a few instances do not total 100%, because types shown for previous years are not shown in 1935 or because no comparable 1933 or 1929 sales ratios are available for certain types shown in 1935.

Proprietors (active proprietors and firm members) are proprietor-owners devoting the major portion of their time to the business. They are not included in the count of employees, nor is their compensation included in pay roll. Corporate officers and executives of corporations are not proprietors.

Employees as shown in these reports represent the number of full-time and part-time paid employees, averaged for the year (total employee-months divided by 12), including executive employees of corporations, except employees and executives of the central offices and warehouses of chains.

Pay Roll consists of salaries, wages, bonuses and commissions paid to reported employees, classified to show full-time and part-time compensation separately.

Operating expenses is the total of all reported expenses of operation (pay roll, rent, advertising, traveling, delivery, interest and overhead expenses), except the compensation of proprietors of unincorporated businesses. The cost of the goods sold is not included as operating expense.

Independents are local, individual enterprises, usually operating a single store but sometimes including two or three similar stores. Of the 1,474,149 independent stores in 1935, single store independents numbered 1,419,855. A few large independents who have developed smaller branches with limited lines, supplied from the stocks of the parent store rather than from central warehouses, are classified as local branch systems. In all there are 343 units of such local branch systems, including the parent stores.

Chains are groups of 4 or more stores in the same general kind of business, owned and operated jointly, with central buying, usually supplied from one or more central warehouses. The count of units does not include the warehouses nor buying offices maintained apart from the stores. Chains are local if substantially all of their stores are located in and around some one city; sectional if in only one part of the country; national if in more than one section. (For more details concerning chains, see special report of the Retail Census series entitled "Retail Chains and Ownership Groups").

Ownership Groups of department stores are not classed as chains if they are not centrally merchandised. Although centrally owned, the several stores of most ownership groups are individually operated and their buying is done by local buying staffs, almost entirely independent of the central organization. (For more details see special report entitled "Retail Chains and Ownership Groups").

Leased Departments are sections of a store operated by an outside independent or chain, rather than by the store itself. So-called rent, or the compensation to the store, may be a flat amount or a percentage of sales, which typically includes many store services in addition to occupancy of lighted, heated and fixtured space.

Utility-operated stores are sales rooms or separate stores of gas and electric utility companies, primarily for the sale of household appliances that increase the power load.

Mail-order houses are places of business confined to the sale of merchandise by mail, from catalogs. Retail stores owned by the same company, whether located in the same building or separately, are properly classified as chains.

Direct selling (house-to-house) consists primarily of central offices or multi-unit headquarters of crews of canvassers who sell from door to door.

State liquor stores are State-owned liquor stores, operated as a monopoly by State liquor boards (or sometimes by counties or municipalities).

Military post canteens are privately-operated eating places or stores, at army posts and naval stations. Commissaries and post exchanges operated directly by any branch of the Service are excluded.

Commissaries or company stores, found principally in lumbering and mining communities, are operated by the individual concerns primarily for the benefit or convenience of their employees.

Unclassified types include consumer cooperatives, rolling stores, itinerant vendors, market stands and roadside stands. (For more details concerning consumer cooperatives, see special report of the Retail Census entitled "Consumer Cooperatives and Voluntary Chains").

Census of Business
Retail Distribution: 1935

UNITED STATES SUMMARY: 1935

STORES, SALES, PERSONNEL, PAY ROLL AND OPERATING EXPENSES, BY TYPES OF OPERATION

Type of Operation	Number of stores	Sales (add 000)	Percent of Total Sales			Active proprietors and firm members	Employees (full-time and part-time). Avg. for year	Pay Roll* (add 000)			Operating expenses, (including pay roll)* (add 000)

x - Withheld to avoid disclosure.

1 The State figures do not add to the United States total, because a small number of chain stores, which are included under "chains" in the United States total, are combined with "all other types" in certain States to avoid disclosure of individual operations.

2 State figures exceed by 9 stores and \$141,000 sales the United States totals, due to delicatessen stores included in the grocery classification in a few States to avoid disclosure of individual operations.

x - Withheld to avoid disclosure.

¹ The State figures do not add to the United States total, because a small number of chain stores, which are included under "chains" in the United States total, are combined with "all other types" in certain States to avoid disclosure of individual operations.

X.—Withheld to avoid disclosure

a.—Mail-order houses are combined with "Chains" in the State figures to prevent the disclosure of individual operations; in the United States total, however, they are included in "All Other Types".

b.—Not shown by types of operation because of absence of three large independent stores, the sales of which constitute a considerable proportion of the business done by independents.

x - Withheld to avoid disclosure.

1 The State figures do not add to the United States total, because a small number of chain stores, which are included under "chains" in the United States total, are combined with "all other types" in certain States to avoid disclosure of individual operations.

x - Withheld to avoid disclosure.

1 The State figures do not add to the United States total, because a small number of chain stores, which are included under "chains" in the United States total, are combined with "all other types" in certain States to avoid disclosure of individual operations.

2 Figures for "independents" include data for one store classified as "all other types", which is combined with independents to avoid disclosure of individual operations.

x - Withheld to avoid disclosure.

1. The State figures do not add to the United States total, because a small number of chain stores, which are included under "chains" in the United States total, are combined with "all other types" in certain States to avoid disclosure of individual operations.

a.- State figures exceed the United States totals because of one "Floor Coverings-drapery" store included with furniture stores in one State to avoid disclosure of individual operations.

x - Withheld to avoid disclosure.

The State figures do not add to the United States total, because a small number of chain stores, which are included under "chains" in the United States total, are combined with "all other types" in certain States to avoid disclosure of individual operations.

a- State figures exceed the United States totals because of two "Electrical Supply Stores" included with "Hardware Stores and Implement Dealers" in one State to avoid disclosure of individual operations.

x - Withheld to avoid disclosure.

1/ The State figures do not add to the United States total, because a small number of chain stores, which are included under "chains" in the United States total, are combined with "all other types" in certain States to avoid disclosure of individual operations.

x - Withheld to avoid disclosure.

1 The State figures do not add to the United States total, because a small number of chain stores, which are included under "chains" in the United States total, are combined with "all other types" in certain States to avoid disclosure of individual operations.

2 1933 figures for "All other types" are included in "Independents"; no separate figures available.

x - Withheld to avoid disclosure.

1 The State figures do not add to the United States total, because a small number of chain stores, which are included under "chains" in the United States total, are combined with "all other types" in certain States to avoid disclosure of individual operations.

x. Withheld to avoid disclosure.

1. The State figures do not add to the United States total, because a small number of chain stores, which are included under "chains" in the United States total, are combined with "all other types" in certain States to avoid disclosure of individual operations.

RETAIL DISTRIBUTION: 1935TYPES OF OPERATIONSECTION TWO - STATE AND CITY TABLES

Section 2 contains a series of tables, one for each State and one for each city of more than 500,000 population, analyzing retail sales data by types of operation, for all kinds of business combined and separately for 26 specified kinds of business.

States are arranged alphabetically. The cities are placed immediately after the States of which they are a part, and are paged as follows:-

	<u>Page</u>		<u>Page</u>
Baltimore	87	Milwaukee	165
✓ Boston	91	New York City	119
Buffalo	123	New York (Boroughs)	121
✓ Chicago	71	Philadelphia	139
✓ Cleveland	131	✓ Pittsburgh	141
Detroit	95	✓ St. Louis	103
Los Angeles	51	✓ San Francisco	53

At the end of this Section (pages 169-170) is a reproduction of the United States Summary table by types of operation for 1933, for ready reference.

(a) Adjustments were made in 1933 figures for comparison with 1929; see footnote, Table 3A, pp. 13-14. (Not reflected above)

- 1/ Includes as compensation for the services of proprietors working in their stores, in lieu of employees.
- 2/ Includes leased departments, market and roadside stands, itinerant vendors and rolling stores, cooperatives, a few retailer-wholesalers (whose business is evenly divided between the two) and company buyers who also operate retail stores. The latter were difficult to identify from the 1929 schedule, and the comparison between 1933 and 1929 percentages is subject to qualification in that the entire 1929 percentage for retailer-company buyers is included for comparison purposes in the percentage shown for independents. Further details are not available from the condensed tabulations used in 1933.
- 3/ Totals differ slightly from other tables because of an error in California in classifying certain apparel stores as department stores. The correction is reflected in this Summary, as well as in the California Type Report.
- 4/ One large national chain with total sales in 1933 (published in the press) of more than \$76,000,000 so changed the character of its business since 1929 that it now is classified as a department-store chain whereas it was a variety-store chain before. If for comparison purposes it were eliminated from the 1933 figures, the proportion of chain sales would be 21.4 percent against 16.7 percent in 1929--conversely, the variety-store proportion of chain sales would be 92.1 percent in 1933 against 89.2 percent in 1929.
- 5/ A discrepancy of \$370,000 exists between the national totals shown here and the State reports, caused by an error in classification of certain stores in Montana and Wyoming. The correction is reflected in the State tables, but is not considered of sufficient importance to justify changing the national totals.
- 6/ The totals differ slightly from other tables because of an error in Illinois in classifying certain electrical appliance stores as radio stores. The correction is reflected in this Summary, as well as in the Illinois Type Report.
- 7/ Restaurants and eating places in the 1933 tabulation include also lunch counters and refreshment stands in addition to restaurants, cafeterias and lunch rooms. The 1929 percentages reflect only the latter two kinds of restaurants and, therefore, are not strictly comparable, but the same basis is considered preferable for future comparisons, in order to distinguish eating places as such from drinking places.
- 8/ This classification was not included in the 1929 Type summary (table 6) and, therefore, no percentage figures for comparison with 1929 are available.
- 9/ Hardware stores in this table include two business classifications, i.e., hardware stores, and hardware and farm implement dealers. Since the 1929 Type summary (table 6) included only the former, 1929 percentages are not available for comparison.
